

Constant flow streams from "lost motion" pumps.

Low Pressure Dosing pressure fluctuation from flow reversal in a single connection dampener leaves pulsation in your system. Use FLO-THRU dampers.

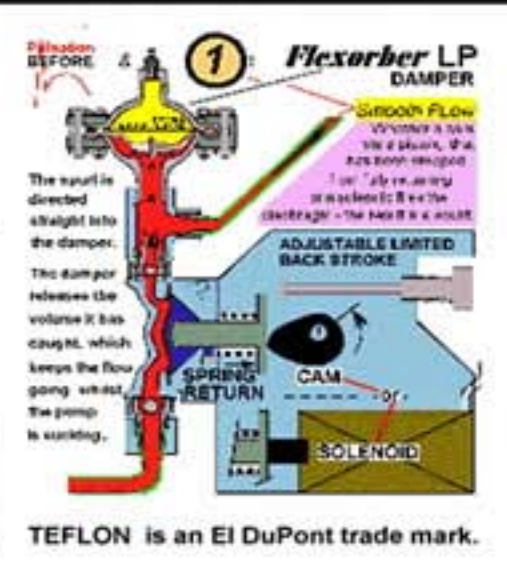

PUMPS make FLOW, SYSTEMS cause PRESSURE, pressure pulsation is a system response, AND a system responsibility NOT a pump manufacturers liability.

Stainless + Elastomer gas bag.
Ask for specific LP Dosing literature and **PIPEGUARD SS/LP** range price list of off the shelf inventory items, dims. weights and drawing.

STAINLESS DAMPENERS
safer & less expensive than plastic.

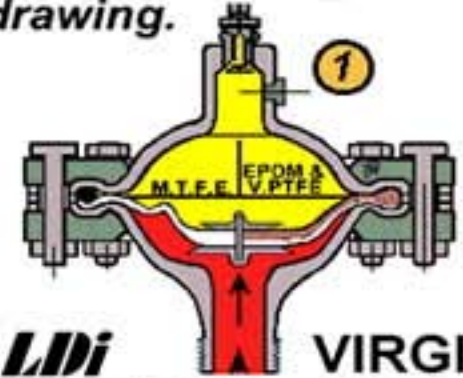

LP DOSING and PULSEGUARD
FLEXORBER LP Not for Chlorides ics. ①
PIPEGUARD LP SS & Hypalon, EP, Fluoro --- ②
PIPEGUARD PLASTIC ③ Ferric chloride, Na.Hyp.Cl.
PIPEHUGGER LP LINED ④ for Bromics, Nitrics etc.

TEFLON is an E I DuPont trade mark.

Stainless + Flexflon

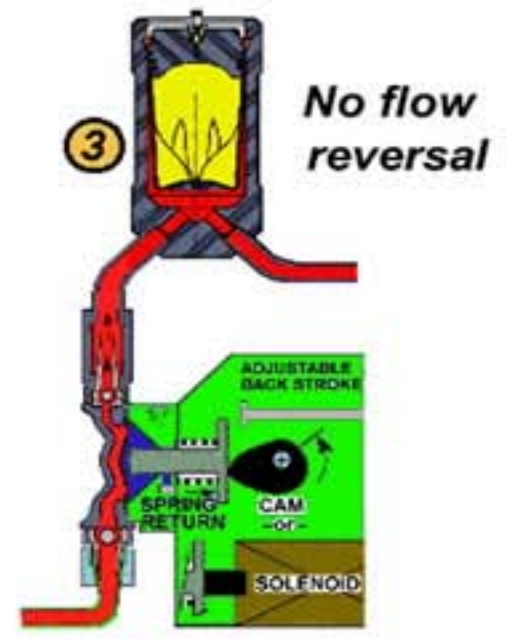

Ask for specific LP Dosing literature and **FLEXORBER SS/LP** range price list of off the shelf inventory items, dims. weights and drawing.

LDi VIRGIN FLEXFLOW or TEFLON
In place flushable flow through dampers are off shelf, lowest cost standard inventory.

Plastics + Elastomer gas bag

Ask for specific LP Dosing literature and **PIPEGUARD PLAS** range price list of off the shelf inventory items, dims. weights and drawing.

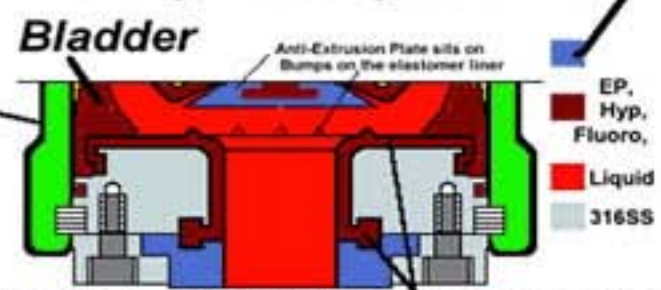

with PLASTIC DAMPENERS

Ask for specific LP Dosing literature and **PIPEHUGGER LP** range price list of off the shelf inventory items, dims. weights and drawing.

Dampeners with Replaceable linings when you need corrosion resistance of special metals

HOW TO MAKE SAVINGS Using the minimum amount of high cost special metal

Replaceable elastomer liner in same material as liquid bladder

When you see a damper or a pump of particular interest, please request literature dedicated to that subject.
